

7/9/08

Kristie/Eric:

very little to report since the last POLREP. The data from the 6/14 sampling not yet received (although should be receiving shortly). The sample points are, however, as Eric and I discussed with the parties on the field visit. I have asked The PRP to send me the laboratory reports as soon as practical (even before his consultant incorporates into a final deliverable for us). This way we can get a sense of any contamination that may exist and discuss the scope of any cleanup plan that may be needed.
